Gachibowli, Hyderabad

- Participated in the Polytechnic Industrial Training Program, focusing on key areas including Data Communications (Networking), HTML, Java, and Android App Development.
- Developed and enhanced software applications using Java, contributing to improved functionality and performance.
- Designed and implemented user-friendly web pages using HTML, enhancing the user experience for internal applications. Created documentation for software solutions.
- Collaborated with a team to troubleshoot networking issues, applying principles of data communication to optimize system performance.

Projects

Wanderlust | Frontend:- EJS, Bootstrap Backend:- MongoDB Express.js Node.js

July 2024

- User Authentication and Profiles: Users can sign up, log in, and manage their accounts seamlessly. Personalized profiles allow users to track their bookings, favorite properties, and reviews.
- Property Listings and Reviews: Hosts can easily list their properties with detailed descriptions, photos, and pricing. Guests can leave ratings and reviews after their stay, helping others make informed decisions.
- Advanced Search and Filtering: Users can search for properties by location, availability, price range, amenities, and more, making it easy to find the perfect stay.

Zerodha - Stock Marketing Website | Frontend:- HTML, CSS, JS, ReactJs, MaterialUI

July 2024

Backend:- Node.js Express.js Authentication Database:- MongoDB Deployment:- AWS
